

CodeVenture 2.0 PRE-EVENT REPORT

CodeVenture 2.0 is an online treasure hunt where students embark on a thrilling digital quest. The objective of this event is to provide students with an opportunity to experience the excitement of coding and technology through a coding adventure. Additionally, the event serves as a platform to provide insights on what ACM-W is and inform participants on the past and upcoming events of this club.

EVENT DETAILS:-

Event Name : CodeVenture 2.0

Date: 14th September 2024

Time: 4:00 to 6:00 PM

Team Size: 1 (both boys and girls)

Event Venue: Online (MS Teams, HackerRank)

ABOUT THE EVENT:-

CodeVenture 2.0 is an exhilarating event that promises participants a thrilling journey filled with challenging puzzles and intricate riddles. In this epic journey, participants will navigate a landscape of logic and code, uncovering secrets and making epic discoveries along the way. Tailored for both seasoned programmers and newcomers alike, this event offers a series of engaging challenges designed to inspire and test your coding prowess. Participants can look forward to exciting opportunities as they rise to the challenge and explore the mysteries of the digital world by uncovering the clues.

EVENT FLOW:-

- Introduction about ACM-W.
- Treasure hunt: The challenges are designed in a series of levels. The clue deciphered in each level unlocks the next question.
- Announcement of winners, answer reveal and closing.
