About PES University

Established in 1972, PES University is a premier educational institution located in Bengaluru, Karnataka. Renowned for its commitment to delivering high-quality technical education, the university fosters a culture of research, innovation, and industry collaboration. With world-class infrastructure, including state-of-the-art laboratories and workshops, PES University emphasizes the development of practical skills to prepare students for the demands of the modern workforce.

PES University remains dedicated to shaping the leaders of tomorrow – individuals who not only achieve personal success but also contribute meaningfully to the world around them.

About the Bajaj Engineering Skills Training (BEST) Center at PES University

The BEST Program, a flagship CSR initiative of Bajaj Auto Limited (BAL), aims to equip engineering graduates with advanced manufacturing skills in contemporary and evolving technology, bridging the gap between academia and industry. The program offers an interdisciplinary curriculum that includes four key modules: Mechatronics, Motion Control & Sensor Technology, Robotics & Automation, and Industry 4.0 & Smart Manufacturing.

With a strong emphasis on hands-on, project-based learning, 70% of the training is dedicated to practical experience. The BEST Center is equipped with cutting-edge laboratories and technology, including Smart Vision, Augmented Reality (AR), Virtual Reality (VR), the Internet of Things (IoT), Autonomous Mobile Robots (AMR), and Computer Integrated Manufacturing (CIM).

Engineering and polytechnic graduates who have completed their studies in Karnataka with first-class honors or are in their final year are eligible to participate in the BEST Program.
