Thanking you
Sincerely,
For Team Parallax

Annexure 1
Full details of the event

DeltaTime is the **flagship hackathon** of our club, **Parallax**, where people can engage in a creative frenzy and innovative minds converge to craft and code immersive digital worlds in a collaborative, time-bound adventure. Participants unleash their game design prowess, forge new connections, and bring imaginative concepts to life in this dynamic celebration of creativity. At the end of the rainbow lies a **prize pool of Rs. 18,000**.

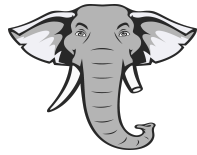

The event will span two days, **March 14** and **March 15**. Participants are expected to develop a game using industry-standard game development tools, a process that typically requires more than a single day, especially considering that we are marketing it as beginner-friendly. Therefore, the total duration of the hackathon will be **16 hours**, excluding the downtime between the two days.
